Skinman Foam

Luxurious, gentle and effective 30 second alcohol based foaming hand rub - 600 mL, 750 mL Nexa, 1 L Nexa
NEW: Ecolab has developed **tamper resistant solutions** for the **table top ABHR bottle,** which is the portable pilferable format most often associated with theft and misuse.

ARTG 314675

Features

- Skinman Foam contains 77.5% w/w Ethanol and has approved clinical indications as both a hygienic hand run and pre-surgical rub.
- Skinman Foam hypoallergenic formula is fragrance-free, dye free and chlorhexidine-free.
- Skinman Foam is dispensed as a rich, non sticky luxurious foam that spreads easily to ensure appropriate hand coverage and wet time.
- Skinman Foam is registered in the ARTG, AUST R 314675 as a hygienic hand rub which conforms to EN1500 with a single 30 second application.
- Skinman Foam is registered in the ARTG, AUST R 314675 as a surgical hand rub with a 120 second application, conforming to EN12791.
- Skinman Foam alcohol based hand rub has a unique skin friendly formulation leaving hands soft, smooth and supple.
- Skinman Foam's unique formulation combines five skin friendly ingredients: Vitamin E (antioxidant protects against free radicals), Niacinamide (encourages production of collagen improving skin barrier function), Glycerin (hydrates and moisturises), PEG12 Dimethicone (protects and locks moisture) and Ethylhexylglycerin (boosts hydration and moisturises).
- Skinman Foam supports environmental management initiatives: eliminating the need for scrubbing brushes, rinsing with water or drying hands post application with sterile towel as the alcohol air dries.
- To support compliance a wide array of entrance stands and hand hygiene stations are available along with signage and education materials.

Universal tamper resistant ABHR solution: whether you prefer liquid, gel or foam presentation – Ecolab has the solution!
Ecolab has developed **tamper resistant solutions** for the **table top ABHR bottle,** which is the portable pilferable format most often associated with theft and misuse.

- Prevents tampering and unauthorised access.
- Reduces OH&S risks, spills and **most importantly** the risk of consumption and alcohol poisoning events.
- Reduces the risk of the product being used to start fires.
- Eliminates contamination by preventing egress of contaminants when the lid is removed, supporting improved clinical outcomes.
- Supports reliable, controlled hand hygiene at every point of care.
